

TECHNICAL SERVICES - LAB PACK

Experience and Knowledge - There is No Substitute.

Tradebe's experienced chemists are highly skilled in handling hazardous materials safely, effectively and responsibly.

Tradebe's Labpack/Depack Facility, East Chicago, IN

TRADEBE'S CHEMICAL PACKAGING SERVICES

Tradebe's highly trained chemists are experienced and knowledgeable in handling virtually all chemical types that accumulate as a natural part of work, production or research.

Typically, these chemicals are obsolete, off-spec, leaking or unidentified and frequently stored in an unsafe manner. They are potentially dangerous if left unattended.

"Lab Pack" chemical identification and management is a job for knowledgeable professionals. Hundreds of different chemicals can often be found at just one site.

Experience and knowledge - there is no substitute!

WHAT IS A CHEMICAL LABPACK?

A "Lab Pack" is a term used to describe a container, typically a 55 gallon drum, filled with various small quantity containers of laboratory chemicals.

The small containers within the drum are usually packed in an inert material such as vermiculite or other such material that allows safe transport of the waste chemicals.

TRADEBE

Sustainability at Work

COMPREHENSIVE, SAFE, RELIABLE - TRADEBE IS THE NAME YOU CAN TRUST.

Tradebe's team has the regulatory experience, technology, and chemical knowledge to complete Technical Service projects, including chemical packaging, properly and safely.
